ENGINE MANUFACTURER 2 Moteurs YANMAR 4JH110CV.	HORSE POWER 2 X 110 CV		

Description

The New FP | 55 represents a significant evolution within the range as the first sailing catamaran from the shipyard to feature a full flybridge. Positioned in the premium segment, she introduces a new benchmark in comfort, space and onboard refinement. At 17 meters in length, she offers generous living areas and seamless circulation between interior and exterior spaces. The bright saloon benefits from enhanced natural ventilation, thanks to a wide sliding glass door and direct access to the forward cockpit — a feature previously reserved for flagship models. Her expansive flybridge, with a centralized helm station grouping all sail controls, provides outstanding visibility and a true 360° panoramic experience. Unique in her class, the FP | 55 can be configured with two identical owner's suites, one in each hull, while still accommodating two fully equipped crew cabins. Flexible Layouts for Every Cruising Plan The New FP | 55 is available in several configurations:

- **Maestro Version:** 5 double cabins including one large owner's suite
 - **Double Maestro Version:** 4 double cabins with two identical owner's suites
 - **Charter Version:** 6 identical double cabins, ideal for premium charter programs
- From family cruising to world voyages or luxury charter operations, the FP | 55 adapts to every sailing ambition. Electric Hybrid Version – ODSea+ With ODSea+, Fontaine Pajot integrates an in-house developed hybrid electric propulsion system, maximizing renewable energy usage and enhancing cruising autonomy. Full control of the R&D process ensures technological consistency and reliability.
